## 80LEGS EXPORT TO GEPHI CSV

80graph is a tool designed to convert csv files which generates [80legs](#) tool into a format suitable for import into [Gephi](#) software. As the next step we plan to introduce graphical representation of data within the tool, but for now the tool just converts from one format to another.

### INSTRUCTIONS:

- Start the 80legs downloader application
- From the result format's drop-down menu, select the option Document Data XML to CSV
- In the table above find the row with the file type ANALYZED\_URL (usually in the second row)
- Click the download link in that row
- Be patient during file downloading, it can take longer if it is a large file

Please choose .zip file from 80 legs

No file chosen

[Convert to Gephi csv](#)

- Large-Scale Visualisation
- Architecture Modelling
- PageRank Projection
- Internal / External Link Flow
- Advanced Statistics
- Hub / Authority Discovery

+ Export
